

Since 1996 C.A.I. Systems GmbH Berlin is a reliable partner for creative artists. With our comprehensive consulting and profound knowledge we help customers selecting the right soft- and hardware tools in the DCC, film and TV market. Long lasting experience and independence in terms of different vendors guarantee a sound basis for enduring purchasing decisions.

3D animation- and rendering solutions, video- and postproduction are the heart and soul of C.A.I.'s actions. Smooth and seamless collaboration of various tools, matching workflows and the design of the optimal infrastructure are core competences:

From desktops and workstations up to servers, rendering and storage systems, C.A.I. develops in close cooperation with its customers the optimal solution for any individual specification. C.A.I. specialised in fibrechannel (SAN), 10-56Gbit networks as well as storage solutions for Windows, Mac and Linux environments.

In addition C.A.I. also offers production services such as rendering, systems administration, programming and rental services. More products can be found at shop.cai-systeme.com.
